Amendments to the Specification:

Please replace the paragraph beginning page 7, line 5 with the following amended paragraph:

Figure 1 illustrates an exemplary network of devices including a content server 10, a personal computer (PC) 20, a set-top box (STB) 30, a wireless device 40, a personal digital assistant (PDA) 50, and a television (TV) 60. The content server 10, the PC 20, the STB 30, and the wireless device 40 are coupled to each other via a communications network [[80]] 70. The communications network [[80]] 70 can be of any conventional type, or a combination thereof. Preferably, the communications network [[80]] 70 is the Internet. The PDA 50 is coupled to the PC 20 via any conventional networking means. The TV 60 is coupled to the STB 30 via any conventional networking means. The wireless device 40 is preferably coupled to the communication network 70 via a wireless connection, although any conventional networking means can be used. It should be clear to those skilled in the art that more or less network devices can be included in the exemplary network of devices illustrated in Figure 1.

Please replace TABLE 2 beginning on page 12, line 16 with the following amended table:
